S P JAIN CAREER SERVICES

Multinational Career Services Offices

Our multinational Career Services Teams in Dubai, India, Singapore and Sydney play a very important role in helping students achieve their career goals. In the initial terms of the program, the teams expose students to corporate centres, business leaders and entrepreneurs through guest lectures, industry visits and projects in the three cities. In the final term of the program, the teams help students build a strong career strategy and identify suitable roles and companies for them to apply to.

Professional Readiness Program

We take great pride in ensuring that each student gets a good job at the end of their postgraduate program and is well placed for a successful career. Our Professional Readiness Program, or PRP, prepares students for this comprehensively. Our work with students as part of the PRP program involves pairing them with their individual career objectives, work experience, educational background and more importantly, positioning them for growth in their careers. PRP also covers leadership and communication training, professional presentation, voice and body language, and how students present themselves in a job interview. For students who wish to change their careers, PRP offers special assistance by training and educating them on their new primary industry of interest. This “soft knowledge” helps students have successful job interviews and adapt better to a new work environment
